

## FEATURES & BENEFITS

### CONSTRUCTION

1-1/4" Type 304 Stainless Steel pipe and fittings along with cast finished stainless steel 9" (22.9 cm) diameter floor flange provide a superior defense in a highly corrosive environment.

### VALVES

Type 316 Stainless Steel ball valve is designed to make the flushing of fluid occur with the simple push of a stainless steel flag, and is equipped with a stainless steel ball and stem to provide a superior protection against corrosion and breakage.

### STRAINERS/FILTERS

Type 304 Stainless Steel in-line 50 x 50 mesh water strainer supplies added protection against corrosion and prevents debris from reaching the eye/face wash so the 8330 stays functioning at its best. Strainer is easily serviceable. Stainless steel dust cover protects eye/face wash head as well as bowl up until the last second before use further optimizing operation.

### SAFETY

8" x 10-3/4" (20.3 x 27.3 cm) universal emergency sign make the unit easily detected in an emergency. Test card to record weekly checks helps maintain the unit's best working quality.

### EYE/FACE WASH

AXION® MSR eye/face wash head (patent pending) uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity.
